# **Biomedical**

-30°C Freezer

#### Stable -30°C environment with extensive storage possibilities

The MDF-U731M is a large-capacity, biomedical freezer, with a direct cooling system and manual defrost. This freezer is designed with optimised features for laboratory-grade freezing of enzymes, vaccines, and other biologics.

## Precise & Uniform Storage

A microprocessor controller ensures precise and uniform storage temperatures regardless of ambient conditions. Manual defrost provides stable temperature control without transient temperature increases.

### Extensive Storage Options

Adjustable shelving accommodates a range of different storage options for a wide number of applications. Optional plastic containers and extra shelves are ideal for storing a variety of different types of samples while inventory racking systems can be used for storage of cryoboxes.

### Excellent Sample Security

A comprehensive visual and audible alarm system with remote alarm contacts ensures users are aware of any abnormalities and can take appropriate actions. A keyed door lock with provision for an optional padlock ensures sample security.

#### **Temperature Sensitive Samples**

Optimum uniformity and stability are ideal for storage of samples that are highly sensitive to temperature fluctuations.

#### A Flexible Solution

The flexible storage possibilities and adjustable temperature range can accomodate both current and future storage needs of growing laboratories.

#### Valuable Sample Storage

An ideal storage solution for valuable samples such as those in the pharmaceutical, biotechnology and medical research fields.

### **BIOMEDICAL** -30°C Freezer

#### **Uniform & Stable Temperature Control**

The large capacity MDF-U731M-PE features direct cooling with a full cold wall design. The evaporator pipes are strategically designed to surround the cabinet in a way that prevents warm or cold spots and therefore ensures superior uniformity throughout the freezer. As well as providing optimum uniformity, the cold wall technology also ensures maximum protection by providing a rapid temperature recovery after door opening.

External dimensions (W x D x H) <sup>11</sup>	mm	770 x 830 x 1955
